
You need reliable, long-term solutions for complex, interconnected technologies.

We manage the equipment, services, logistics and risks to achieve that goal.

LEARN MORE

Sourcing, testing, configuration, and lifecycle management of electronic hardware components and software – within the medical device, aerospace & defense, and other complex and highly regulated industries.

Technology Supply Chain Management

We help to allocate the best products and components; address potential supply risks; ensure compliance; and manage the complete product lifecycle. Clients increase productivity; reduce costs; avoid disruption and meet project milestones.

Validation & Testing Solutions

We analyze requirements, specs and options; verify that components are properly integrated; provide evidence of performance; and certify specification compliance. Clients gain process management visibility; optimize EOL and product transition; and reduce human error risk.

Complex Technical Configuration

We design and build complex technical configurations; troubleshoot systems and hardware; document that solutions are compliant; and manage logistics, from packaging to warranties. Clients maximize product capabilities; drive business results; and achieve operational peace of mind.

Technology Asset Lifecycle Management

We identify and evaluate solutions to maximize the lifespan of products and components; provide an EOL roadmap; and deliver information required for effective change management. Clients avoid production delays; reduce costs; and maintain product quality.

Dynamic delivers consistent, controlled, compliant solutions over every stage of a product's lifecycle.

Core Capabilities

- Supply Chain Management
- Technical / Logistics Services
- Validation and Testing
- Lifecycle Management

Our clients include...

GEORGE P. JOHNSON

faurecia

DAIFUKU

Raytheon

GEN
DYN

Why Choose Dynamic...

Faster Time-to-Market

Reduced time-to-market up to 80%

Cost Reduction

Lower digital hardware costs 5-10%

End-of-life Validation & Transition

Proactive analysis and planning

Risk Mitigation

Verified supply chain risk analyses

Quality & Compliance

100% compliance with industry standards

LET'S TALK

Client Case Studies

Over the past 40 years, Dynamic has helped companies to address a range of strategic and operational priorities, including asset and system security; program and cost efficiencies; supply chain control and risk mitigation; and obsolescence management.

Complex Technical Configuration

Custom Configuration and Delivery of High Security Technology Assets

Validation & Testing Solutions

Leveraging Supplier Relationships to Prevent Revalidation

Technology Asset Lifecycle Management

Full Lifecycle Management of Digital Hardware

Technology Supply Chain Management

Custom Sourcing to Mitigate Downtime and Failure

Supply Chain Risk Scoring ℠

Our Supply Chain Risk Scoring provides data-driven insights into the strengths and weaknesses of any technology supply chain, empowering objective decision-making. This proprietary methodology:

- Keeps customer supply chains effective and efficient
- Optimizes product supply while meeting customer needs
- Assesses and manages a broad range of supply chain risk
- Delivers peace of mind and confidence in the stability of any supply chain
